

firstpass offers a suite of platform modules that create an end-to-end engagement flow between the provider and the patient.

Each of these modules facilitate a comprehensive interactive process for patients to request services from the healthcare facility. All of which effectively help in creating your digital front door and beyond.

Whatever your challenge, each of these modules can work independently but perform better when working together to give you the best possible outcome for your patients and your facility.

Read on to discover more about each of our modules or visit <https://www.vectramind.com/#/firstpass> to know more.
