LENORA'S PEDIATRIC AND PREVENTIVE DENTISTRY

GIVING REALITY TO THE DREAMS OF PROSPERITY !

WE LEARNT ! WE HELPED !

WE ACHIEVED HEALTHY YOUNG SMILES!!

Multidisciplinary treatment approach

Pediatric Dentists have a greater likelihood of establishing Dental Home early to promote prevention by teaming up with other branches of Dentistry.

Research Guidance

Our Vision is to develop, advance and disseminate knowledge of dental sciences and related fields to benefit society and strives to be a global leader in research and education.

Providing a base to serve humanity

The Department conducts regular dental health camps for educating, motivating and treating the children to improve their oral hygiene and health status.

EVERY EXPERIENCE MAKES YOU GROW !!

8000+ cases of crowns

Lenora also lets you try multiple aesthetic ways to rehabilitate the severely damaged primary dentition using SSC, Strip crowns and Zirconia crowns.

4000+ cases of Interceptive Orthodontics

You are provided with the scope to deliver multiple space management appliances from infants through adolescence to reduce the chances of malocclusion.

500+ Full mouth rehabilitations

An opportunity to recreate happy smiles in toddlers and infants affected by severe early childhood caries. Here, we provide comprehensive chair-side full mouth rehabs.

800+ cases of Preventive Orthodontics

Through a multidisciplinary approach, Lenora provides you with the chance to do interceptive removable and fixed orthodontic appliances.

12+ cases of full mouth rehabilitations under Conscious Sedation

We offer you a trained anesthetist along with N2O-O2 Conscious sedation unit. This window of opportunity can be helpful in using the equipment.

7+ cases of full mouth rehabilitations under General Anesthesia

We provide you an opportunity to deliver full mouth rehabilitations under GA. A trained anesthetist is always at your side to guide you.

Practice based teaching and learning

Your learning scenarios are optimized to better suit the treatment needs of the patient thereby improving your clinical expertise.

Upto 17 years of age

An opportunity to treat child upto 17 years of age. This would keep in touch with the patients until the treatment plan changes as per adult needs.

THINKING ABOUT POST GRADUATION IN LENORA ?

- Multidisciplinary approach
- Conscious sedation
- General anesthesia
- Interceptive Orthodontics
- Special Health care Needs
- Research Guidance
